SOUTH WEST **OBSERVATORY**

Census Outputs and Analysis Planning

Free
early booking advised

Friday 21 September 2012

HCA offices, 2 Rivergate, Temple Quay, **Bristol** BS1 6ED *(adjacent to Bristol Temple Meads station)*

This event will update users on how to access the more detailed Census data, as it becomes available from November 2012 onwards. This will include demonstrations of some of the new ONS data dissemination tools. ONS and the ESRC will update delegates on their analysis programmes, before Observatory network members discuss and present their own plans for understanding and interpreting the Census results.

By mapping out analysis programmes across national and subnational geographies, the aim of the day will be to understand how we make the best use of this rich source of information to identify any duplication or gaps in analysis and to establish how gaps may be filled through collaborating and sharing resource. This event will appeal to officers who will be working with the 2011 Census data, now and for years to come.

Programme
